UC02 – View Processes List

Use Case ID	UC02
Parent Use Case ID	-
Primary Actor	User
Secondary Actor(s)	-
Brief Description	Provides a list of zero or more running processes to the user.
Pre-conditions	-

Flow of Events		Actor Input	System Response
	1	Clicks "Running Processes" button at Main Menu.	
	2		Populates and shows a list with all the running processes and the amount of ram each one uses.
	3	Inspects the list.	
	4	Navigates back.	
	5		The list disappears and Main Menu is visible.
	6		End of UC02.

Post-conditions	-
Exceptions	-
Non-functional requirements	Fast response time and easy to use UI.
Assumptions	User has already navigated to the Task Manager.
Issue	-

Alternative Flows		Actor Input	System Response
	4.1	Long clicks one of the processes from the list.	
	4.2		Calls UC04 "Kill Process".
	4.3		UC04 returns when the user has chosen to kill or not the selected process.
	4.4		If the selected process was killed, its entry is removed from the list.
	4.5		The control is passed to step 3.
